(54) METHOD FOR AUTOMATICALLY MONITORING ACHIEVEMENT OF TRAINING TARGET BY COMPUTER

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a method for automatically monitoring achievement of a training target of a trainee within a frame of a training course including at least one training unit.

SOLUTION: This method comprises: a step 2 of selecting problems from a problem group, a step 5 of creating management tests by collecting the selected problems, a step 7 of making it possible for a trainee 3 to utilize the management tests, a step 8 of recording the answers to the problems of the management tests by the trainee 3, a step 9 of comparing the answers with necessary given values, a step 11 of creating additional training units in the case that required values are not achieved, a step 12 of making it possible for the trainee to utilize the additional training units, etc.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
